Triple Offset Butterfly Valves

Reliable Support from the OEM

Overview

TRILLIUM Valves USA™ (formerly Weir Valves & Controls USA Inc.) is an innovator in the design and manufacture of engineered valves. Founded in Massachusetts in 1900, the company has developed an impressive range of custom engineered valves and gained a distinguished reputation for product quality, performance and dependability.

Why choose TRILLIUM Valves USA™?

- Technical expertise / advisors
- 24/7 support from the OEM
- Product history / installed base
- Proven designs / long life cycle
- Well known brands
- Custom engineered valves

We service our worldwide installed base of valves by offering the following aftermarket support:

- Spare and replacement parts
- Replacement valves
- Field service crews
- Outage support
- Maintenance, repair and modification
- Technical support
- Skilled welding and machining services
- Custom operation manuals
- Sales & technical bulletins
- Valve training on-site or at our factory

Visit our website www.trilliumflow.com for company and product information, industry brochures, catalogs, product sheets and technical bulletins.

Contact Us

For inquiries and support, our aftermarket team can be reached at +1 978 744 5690 or valvesusa@trilliumflow.com Please have the following information available:

Parts Inquiry

To order spare parts from the OEM for your A&M®, Hopkinsons® and TRICENTRIC® valves, please provide the following information from your valve tag: 1) Order number which coincides with the valve drawing 2) Valve size 3) Pressure rating 4) Part description.

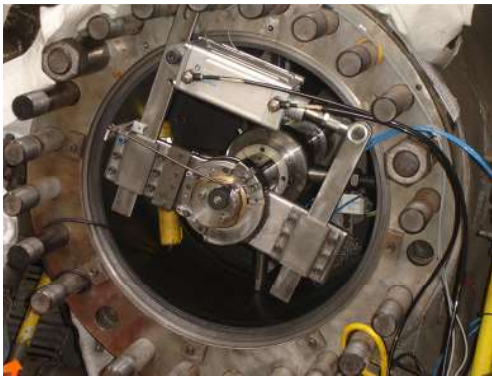

Service Inquiry

When contacting us for a service proposal, please have the following information readily available: 1) Site location 2) Outage schedule 3) Specific valve information (Drawing # or Order #) 4) Type or scope of service needed.

Valve Inquiry

TRILLIUM Valves USA™ is the original equipment manufacturer of Atwood & Morrill® (A&M®) Parallel Slide Gate, Globe & Check valves and Nuclear TRICENTRIC® Butterfly valves. We also supply and support Hopkinsons® Parallel Slide Gate valves to the Americas on behalf of our sister company, Trillium Flow Technologies™ UK Ltd.

To request a quotation, we require: 1) Valve type needed 2) Project name 3) Country of installation 4) Design conditions 5) Application information.

Specialty Welding and Mobile Machining Capability

Trillium has partnered with several industry leading organizations to expand our standard service offering to include remote, robotic welding and specialized machining.

Services include ASME Section IX and XI welding, steam cut erosion repair, seat replacement, guide rib excavation, weld repair / finish machining and complete new valve installation.

Large bore valves are our specialty. Main Steam Isolation, FREE FLOW® Reverse Current, Parallel Slide Gate, 3-Way By-Pass, Compressor Discharge Check, Trip Throttle and Feedwater Check are some of the valves we manufacture and service.

Remote Technical Services

TRILLIUM Valves USA™ now offers Remote Technical Service, in addition to our Field Service Support.

When travelling to the job site is not preferred or not possible, TRILLIUM Valves USA™ can offer remote, dedicated Technical Representative(s) who provide consultation services to the job site. Remote Service Engineers are the same expert technicians that would be provided for onsite service and hold years of experience on all TRILLIUM products.

With access to OEM technical documentation, best practices and Design Engineering support we set our customers up for the greatest success; ensuring they return their products into service within the proper specifications recommended by the OEM. This ensures future performance of our products and value to our customers.

We are proud to service our customers, even when we are unable to visit their site in person. Please contact us at valvesusa@trilliumflow.com for valve support.

Valve Training

TRILLIUM Valves USA™ is located in a state of the art manufacturing facility in Ipswich, Massachusetts. This new facility has enabled us to provide training to customers on all of its product lines.

The training consists of classroom activities along with hands-on training. Trillium also performs training at customer sites. Contact the Trillium Product Service Department for details on in house or on site training.

Trillium prides itself on customer satisfaction and providing its customers with world class services and manufactured parts. If you are interested in utilizing Trillium's service crews or service representatives please contact the Aftermarket Service Department at **+1 978 744 5690**.
