For over 120 years the brand has evolved,
pumps design has been developed,
our reputation for Quality and Reliability continues

By choosing Trillium Flow Technologies™ Gabbioneta Pumps™ original spare parts, robustness, resilience and strength of our pumps is improved, significantly increasing the operating life of your project. We combine spare parts with the applied knowledge of our service team and Certified Service Centers, to ensure that warranties can be extended by the installation of spare parts.

Post Order Management

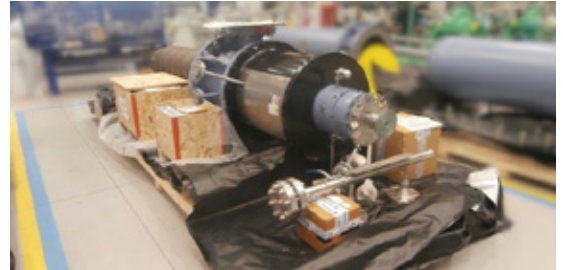

Objective

Through our dedicated team we take care of all tasks and activities to enable our customers – EPC's and end users – to make our Gabbioneta Pumps and Begemann products operative, following the schedule of the project.

Trillium Pumps Italy ensures the management of the final part of the order. Once the pump is shipped, the Project management team supports EPC's or directly the end user during installation, commissioning and start-up.

Typical Activities

- Management of any additional needs which arose during the installation
- Technical support during installation
- Organization of the shipment of any urgent material.

Technical Assistance and Technical Support on site

Objective

- Technical assistance: technical consultancy for installations onshore and offshore.
- Technical support on site: qualified personnel for installation, commissioning, start-up and future maintenance, onshore and offshore.

Technical assistance

Trillium Pumps Italy provides any assistance to technical queries coming from end users through a dedicated service engineering team.

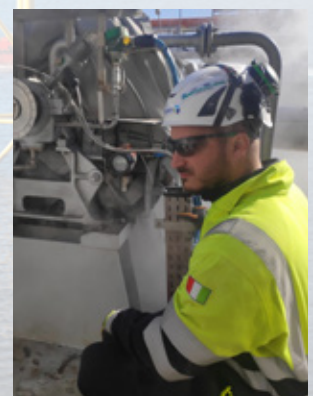

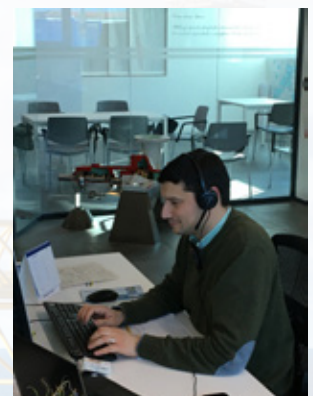

We communicate through emails as well as video-conferencing tools in order to get a clear picture of the topic and to provide a timely and precise reply to our customers.

Technical support on site

Trillium Pumps Italy provides field service support for installation (supervision), commissioning (of pumps and auxiliary systems) and start-up. We provide our services on site and through remote assistance.

All our field service engineers are of proven experience and have successfully completed the Trillium Pumps Italy Service Training.

Our personnel is qualified to go offshore (BOSIET certificates).

WE'RE HERE

Warranty Extension Long Term Service Agreements

Objective

Warranty extension of our products based on a mandatory site survey to check the current status of the pumps.

Long Term Service agreements with provision of scheduled maintenance and suggested spare parts packages.

Trillium Pumps Italy designs Long Term Service Agreement (LTSA) packages, customized on client needs.

Typical LTSA includes

- Scheduled maintenance programs
- Spare parts supply
- Deployment of specialized service engineer.

Training

Objective

Our Trillium Pumps Italy training team is available to carry out training sessions to end user personnel.

We provide trainings packages in-house or on-site for engineering, operations and maintenance personnel either on installed base or specific pumps.

Training Offering

Description	Days	Italy	Local	On site
		Headquarter	Service Center	
a. Service Training lev. 1 *	5	•		
b. Service Training lev. 2 **	5	•		
c. Operations	5	•	•	•
d. Maintenance without hands on	4	•	•	•
e. Maintenance with hands on	5	•	•	•
f. Engineering	5	•	•	•
g. Pumps Basics	2	•	•	•
h. Customized sessions	Tbd	•	•	•

* Pump fundamentals, problem solving on single stage pumps; preparatory to lev. 2

** Review lev. 1 + multistage pumps, mechanical seals and on-site failure analysis and troubleshooting.

- Final examination at the end of the training and attendance certificate released.

TO SUPPORT YOU

Diagnosis and Troubleshooting on-site

Objective

Trillium Pumps Italy assists customers in carrying out a pump health check in order to increase pump reliability, optimize spares usage and maximize production.

Timeline

Diagnosis tools

Vibration analyser
Laser alignment tool
Ultrasonic portable flow meter
Infrared thermometer

Certified personnel

A team of certified service engineers available for diagnosis on site activities.

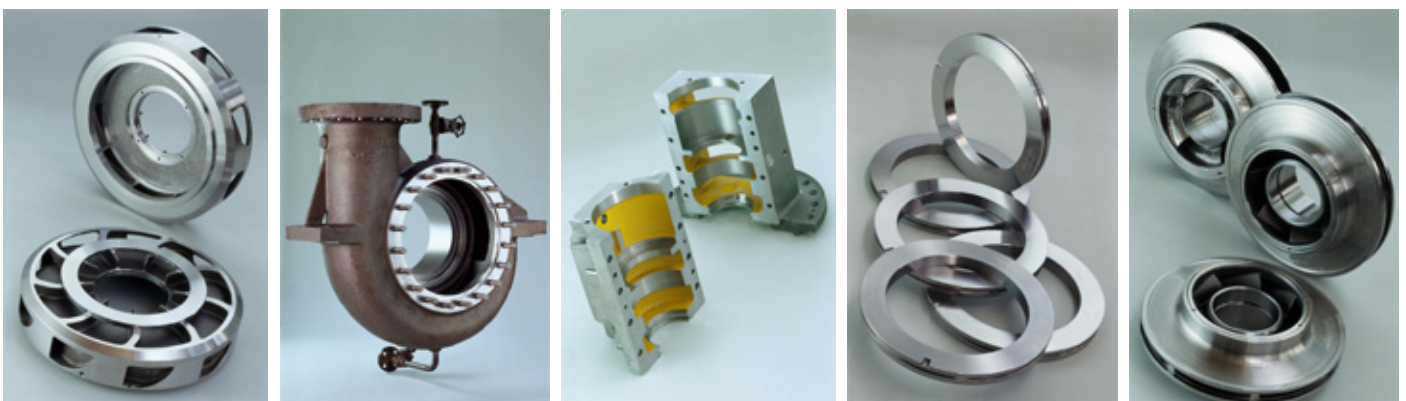

Original Spare Parts Supply

Objective

Trillium Pumps Italy recommends only original spare parts be used in order to guarantee performance and optimize product lifecycle.

A dedicated team with commercial, technical and project management competencies is available to satisfy any customer request.

A fast-track approach is offered in case of urgent needs.

THROUGH THE LIFETIME

Machine Revamping, Retrofit and Replacement

Objective

Trillium Pumps Italy assists customers through the entire lifetime of the pump in order to satisfy any request to repair, update or replace, both our own and other products.

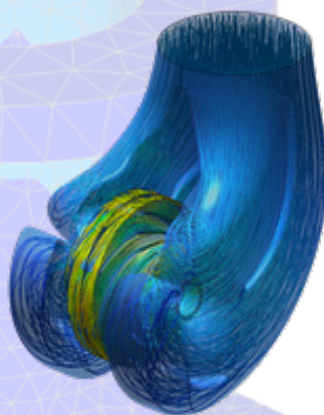

Revamping

With more than 25.000 machines installed since 1965, we are able to repair and bring back to the original condition any Begemann and Gabbioneta Pump.

Retrofit

Because of our extensive engineering know how, and through the latest FEM/CFD analysis, existing machines are modified to like-new conditions: hydraulic and mechanical improvements, material upgrades and instrumentation and auxiliary systems refinement are implemented to meet customer requests and the latest design standards.
