VALVE REPAIR

Valve servicing - From the valve specialists

Trillium's highly flexible and well-qualified service team offer service support, for routine maintenance and trim overhauls to complete Pressure Relief Valve outages and pressure testing.

Any Job, Any Size, Any Time

Whether you have a single valve for service or a large quantity of valves requiring a complete overhaul, Trillium offers the resources, skills and experience to complete your job efficiently, expertly and on time.

Quality Assurance

All completed service operations are covered by a service report and a final test certificate which identifies each stage of the work which has been completed along with recommendations for any future service work. The procedures we employ mirror those used for manufacturing new valves, ensuring full compliance with ASME requirements.

Nationally Recognised Qualifications

Our engineers have been approved by the National Board of Boiler and Pressure Vessel Inspectors to perform Pressure Relief Valve testing, repair and certification in accordance with ASME codes.

Your Valves are in Safe Hands

Our engineers follow the strictest health and safety procedures within our workshop facility. We observe rigorous safety precautions when receiving and servicing valves or when handling components which may be contaminated.

On-Site Service

Utilizing our network of valve repair (VR) shops, we can mobilize a team within 24 hours or within 72 hours for OEM required repairs, subject to engineer availability.

Fully Equipped Workshop

The service workshop at our Deer Park shop is capable of handling large shut-downs within fast turn-around times.

Our workshop facilities include:

- ✓ Painting booth
- ✓ Gas and liquid test benches
- ✓ Extensive storage capability
- ✓ Multi-functional machines suitable for any shutdown work.
- ✓ Welding and overlaying equipment
- ✓ A dedicated service test bay capable of hydrostatic testing up to 8,000 PSIG
- ✓ Flexible workstations
- ✓ Machining of and provision of original manufacturer parts
- ✓ Sandblast, aqua-cleaning and degreasing machinery to bring back components to 'near-new' condition.

Spare Parts & Valves

Trillium Flow Technologies Deer Park offers a comprehensive inventory of spare parts and valves to support all our Pressure Relief Valves.

Whether you need replacement parts or a completely new valve, we have you covered.

The traceability of any modifications is logged against the valve serial number to ensure we keep track of our customers' future needs.
